

PRESS RELEASE  
SEPTEMBER 9TH, 2021

## THE NEW PORT OF CALAIS OFFICIALLY INAUGURATED AFTER 6 YEARS OF CONSTRUCTION

Considered the largest European port infrastructure project of the decade, the new port of Calais was inaugurated on 9 September 2021 in the presence of :

**Louis Le Franc**, prefect of Pas-de-Calais,  
**Xavier Bertrand**, president of the Hauts-de-France region,  
**Natacha Bouchart**, Mayor of Calais, President of Grand Calais Terres & Mers,  
**Jean-Marc Puisseuseau**, President of the Société d'Exploitation des Ports du Déroit.

The extension and modernization of the port of Calais represented an investment of **€863 million**. An innovative financial package combining public and private funding from the Hauts-de-France Region, Europe, the Hauts-de-France Chamber of Commerce and Industry, the Caisse des Dépôts and Meridiam.

**PRESS RELEASE**  
**SEPTEMBER 9TH, 2021**

Delivered on May 5, the Port of Calais was officially inaugurated on September 9. It is scheduled to be commissioned in October. Located in the heart of one of the busiest, most active maritime straits in the world in terms of passenger and goods transport, the new Port of Calais was designed in 2002 on the initiative of Calais' Chamber of Commerce and Industry, then concessionaire of the Port. This port extension and modernisation project was designed to anticipate and adapt to the development of cross-Channel traffic, new-generation ships and the logistics and industrial needs of tomorrow.

With heavy goods traffic which has practically doubled and a volume of cross-Channel freight which has tripled over the past 20 years, the infrastructure of the Port of Calais no longer made it possible to ensure an optimal quality of service. Once the port's capacity limit had been reached, its extension appeared essential. Beyond increasing the capacity of the terminals, the challenge was also to accommodate future generations of ferries over 220 metres long which require longer docking quays and whose manoeuvres require larger basins.

## **A REFERENCE PROJECT IN EUROPE**

The extension of the Port of Calais includes a seawall of more than 3 kilometers long, a 170-hectare basin, 90 hectares of which are navigable in the first phase, 65 hectares of platforms and roads, three new ferry berths, as well as 39 buildings necessary for the operation and secure reception of port customers. To meet the challenges of the ecological transition, the port's design incorporates the constraints of climate change and strictly respects commitments to preserve flora and fauna. The new Port of Calais represents a tremendous development opportunity for the Calais area and for the entire Hauts-de-France region.

## **SERVICES AND COMFORT, THE KEYS TO IMPROVING TOURIST ATTRACTIVENESS**

With 100 ship movements every day and soon a departure every 36 minutes, Calais is the leading French passenger port with 8.5 million passengers annually (2019 figures). While the health crisis had a strong impact on tourist traffic in 2020, a recovery is on the horizon. Today, attracting more European passengers is a major challenge for the Port of Calais and its three shipping companies operating there, namely DFDS Seaways, P&O Ferries and, most recently, Irish Ferries since June 2021. As part of its metamorphosis, the Port of Calais is banking on the quality of services offered and the comfort of its customers to increase its tourist appeal. The new passenger building, constructed on the edge of the basin and accessible from the boarding areas, enjoys considerable advantages: a 1,000 m<sup>2</sup> duty-free (see below), a large restaurant area and children's play space which further adds to the range of services and improves passengers' waiting experience. Its all-glass, transparent design offers a marvellous view of the basin.

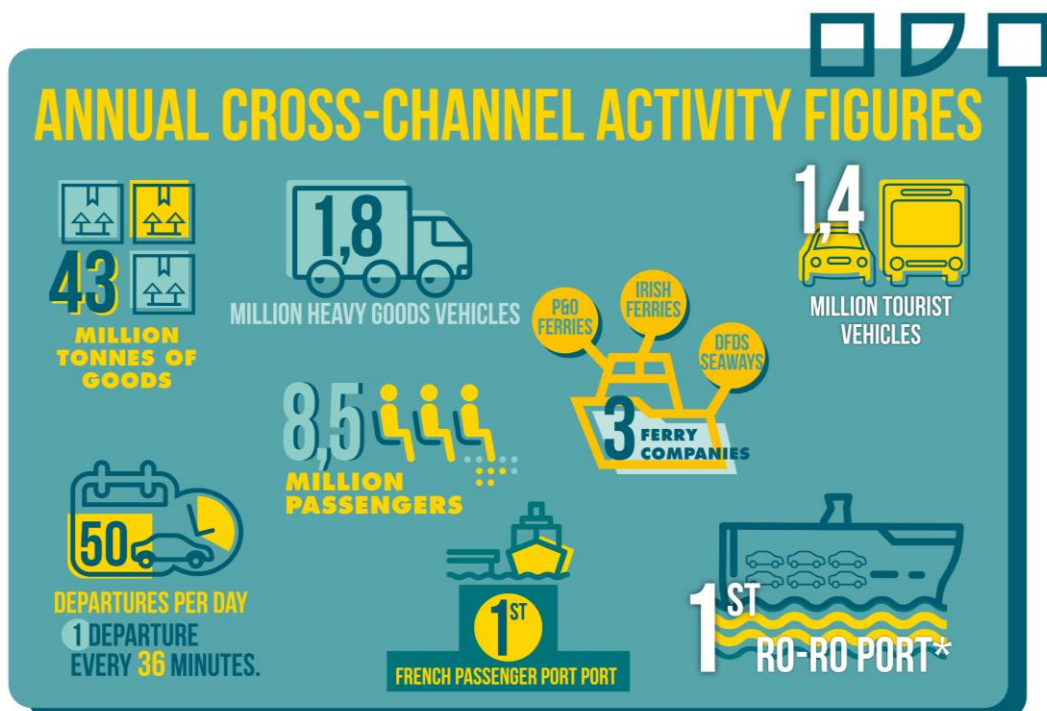

## PRESS RELEASE SEPTEMBER 9TH, 2021

Having disappeared in July 1999, duty-free is making a big comeback on the cross-Channel route. The duty-free shop will cover 1,000 m<sup>2</sup> on the ground floor of the Le Calais building in the customs area, accessible directly from the boarding areas. A click & collect service will also be offered to travellers who can easily pick up their purchases after placing their order on the internet» It will open in October when the new port comes into service.

### CALAIS, MORE THAN A PORT

The new port provides Calais and the Hauts-de-France region with an exceptional facility that resolutely looks to the future. Beyond its extension and modernisation, its merger with the Port of Boulogne, its recent quadruple ISO certification as well as the association of employees with the capital of the company - unique in a French port - make Port Boulogne Calais an incomparable model in Europe. The six years of work are just a first step: the configuration of the port will continue over the decades depending on traffic and the needs of companies to meet the cross-Channel challenges by 2100.

## **A propos du Port Boulogne Calais**

*The Port of Boulogne-sur-Mer and the Port of Calais became on July 22, 2015, within the framework of the Public Service Delegation granted by the Hauts de France Region, owner of these two ports, the single port " Port Boulogne Calais ".*

*Operated by the Société d'Exploitation des Ports du Détroit (SEPD), whose headquarters are located in Calais, the Port of Boulogne-Calais is a port platform that brings together France's leading fishing port, France's leading passenger port, continental Europe's leading port for Ro-Ro (roll on - roll off) traffic and Europe's leading center for the processing and marketing of seafood. It is the 4th largest French port for goods.*

*Within the framework of the public service delegation, SEPD has been entrusted with the implementation of the "Calais Port 2015" project to double the size of the port of Calais, which is scheduled to come into service in October 2021. SEPD has entrusted the project to the project company, Société des Ports du Détroit*
