

CORPORATE SOCIAL RESPONSIBILITY

"Our goal is to make the Port Boulogne Calais the leading interconnected port platform in Europe, by relying on operational excellence, solid financial performance and operation in harmony with our environment and at the service of collective performance. »

The Port Boulogne Calais has integrated the environmental, social and societal issues of today and tomorrow within its strategy, in order to ensure sustainable development for itself and for all stakeholders. **This approach forms part of a policy of sustainable, civic and solidarity-based growth and contributes to the Sustainable Development Goals (SDGs) of the United Nations' Agenda 2030.**

Our six priority objectives:

- To ensure the satisfaction of our customers and users,
- To protect the health and safety of people and property,
- To preserve the natural and living environment for everyone,
- To ensure attractiveness of and support for initiative and innovation,
- To ensure the development and well-being of employees,
- To behave ethically, responsibly and as a citizen.

Our ten commitments:

- To improve our management system,
- To encourage the reduction of atmospheric emissions,
- To preserve water quality,
- To promote the integration of the Boulogne-sur-Mer and Calais sites within the city,
- To maintain ecological continuity and balance,
- To process and recover all waste, whether our own or inherent to our activities,
- To fight discrimination,
- To ensure satisfactory working, health and safety conditions,
- To encourage personal development and the acquisition and building of skills,
- To develop a port community of shared goals and means.

OUR COMMITMENTS ARE CERTIFIED BY FOUR INTERNATIONAL ISO STANDARDS

In order to ensure the concrete implementation of this approach and to maintain momentum in our commitment to a policy of continuous improvement, the Port Boulogne Calais undertakes to follow an ambitious programme of certification in the areas of **Quality, Environment, Occupational Health and Safety, and Food Safety.**

Today, it is the **only port in Europe to meet four international management standards across all its sites and activities.**

The Port is committed to a new approach in order to obtain the ISO 50 001 standard regarding energy management, with significant ecological stakes
